Profile

software engineer: capable of working with a variety of technology and software solutions, and managing databases. Valuable team member who has experience diagnosing problems and developing solutions. Extensive expertise in networking systems and working with mainframe computers. Talented leader with unique ideas.

Education

Baccalaureate <i>BOUAZIZ RABEAA</i>	2017 ORAN, ALGERIA
License Computer Science <i>ORAN 1 AHMED BEN BELLA</i>	2017 – 2021 ORAN, ALGERIA
Master Decision support and intelligent system <i>ORAN 1 AHMED BEN BELLA</i>	2021 – 2023 ORAN, ALGERIA

Professional Experience

Realization of an acquisition application of oxygen saturation <i>License project</i>	2021 Oran, Algeria
---	-----------------------

Develop a solution to capture, process, visualise and store oxygen saturation data from the Dash 4000 monitor in real time, in order to improve patient monitoring and facilitate retrospective analysis.

- Dash 4000 (Data source)
- PyShark (Network capture and analysis)
- Tkinter (Human-machine interface)
- PyMongo (Data persistence)

Development of an alert system based on deep learning for the monitoring of patients in intensive care	2023 Oran, Algeria
---	-----------------------

Development of an intelligent software solution enabling the real-time capture, processing, visualisation and storage of all vital signs from the Dash 4000 monitor, incorporating a multivariate deep learning model for the prediction and early detection of episodes of clinical deterioration in intensive care patients.

- Dash 4000 (Data source)
- PyShark (Network capture and analysis)
- TensorFlow / Keras (AI engine)
- PyMongo (Data persistence)

Backend developer <i>Sophal SPA</i>	2023/08 – 2025/08 Oran, Algeria
---	------------------------------------

Development and maintenance of the Stock, Production and Maintenance modules. Key responsibilities: designing and implementing back-end functionality using Java and the Axelor Framework, optimising performance, managing data flows, integrating modules and resolving issues to ensure the reliability and efficiency of the company's information system.

Software Engineer

Sophal SPA

Development and maintenance of the Stock, Production, Maintenance, CRM, Human Resources, Budget and Insurance modules. Key responsibilities: designing and implementing back-end functionalities using Java and the Axelor Framework, optimising SQL queries, creating dashboards and reports, managing data flows, integrating modules, and resolving issues to ensure the reliability and efficiency of the company’s information system.
